EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 20, line 1 delete "1" and replace with - - 11 - - in order to have claim 20 properly depend on method claim 11.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: The claimed invention is drawn to the following:

Claim 1 (Currently Amended)

A printing plate material comprising an aluminum support, and provided thereon, an image formation layer containing thermoplastic ~~particles~~ and particles, a light-to-heat conversion dye, and a mixture of an electron providing dye precursor and an electron accepting developing agent, the printing plate material being capable of being developed on a printing press, wherein the image formation layer changes in color due to infrared laser exposure, and the aluminum support is manufactured by a method comprising the steps of subjecting an aluminum plate to electrolytic surface roughening treatment, subjecting the electrolytic surface roughened aluminum plate to etching treatment in an aqueous alkali solution, and subjecting the resulting aluminum plate to anodization treatment.

The inventive step is the combination of the now claimed electron providing or donating dye precursor and an electron accepting developing agent in a printing plate material comprising thermoplastic particles and a light-to-heat conversion dye. The prior art references cited of record disclose the claimed printing plate comprising thermoplastic particles and a light-to-heat conversion dye wherein, however none of the references disclose the now claimed electron donating dye precursor and electron accepting developing agent. In addition the applicants have perfected priority by submitting a certified English translation of the foreign priority application, which removes MAEMOTO et al, SAMPEI 2004/0055490, and YANAKA et al (2003/0189653) as prior art.

Because none of the prior art references of record anticipate or render obvious the claimed invention, claims 1-20 are seen as allowable and passed to issue.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
